

Here's the process for registering and logging in.

#1 Navigate to <https://can-bv.ca>. You will see something like the following screen:

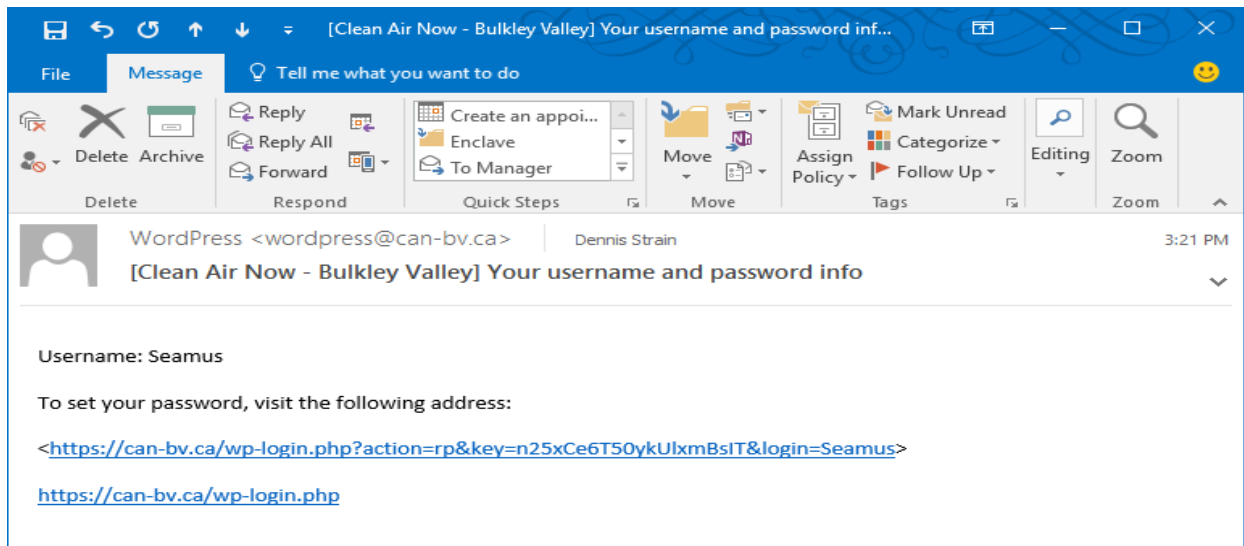

#2 Scroll down until you see the Register hotspot on the right-hand pane. Click "Register."

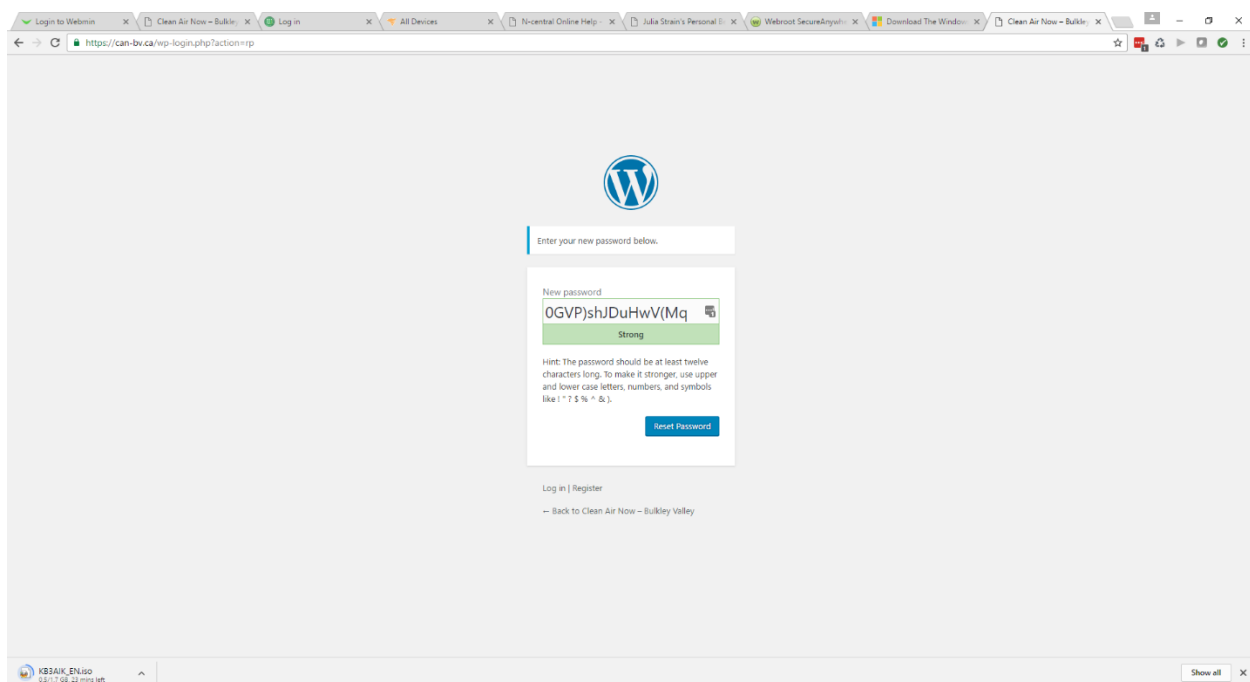

#3 Enter a username and your email address, then click the "Register" button.

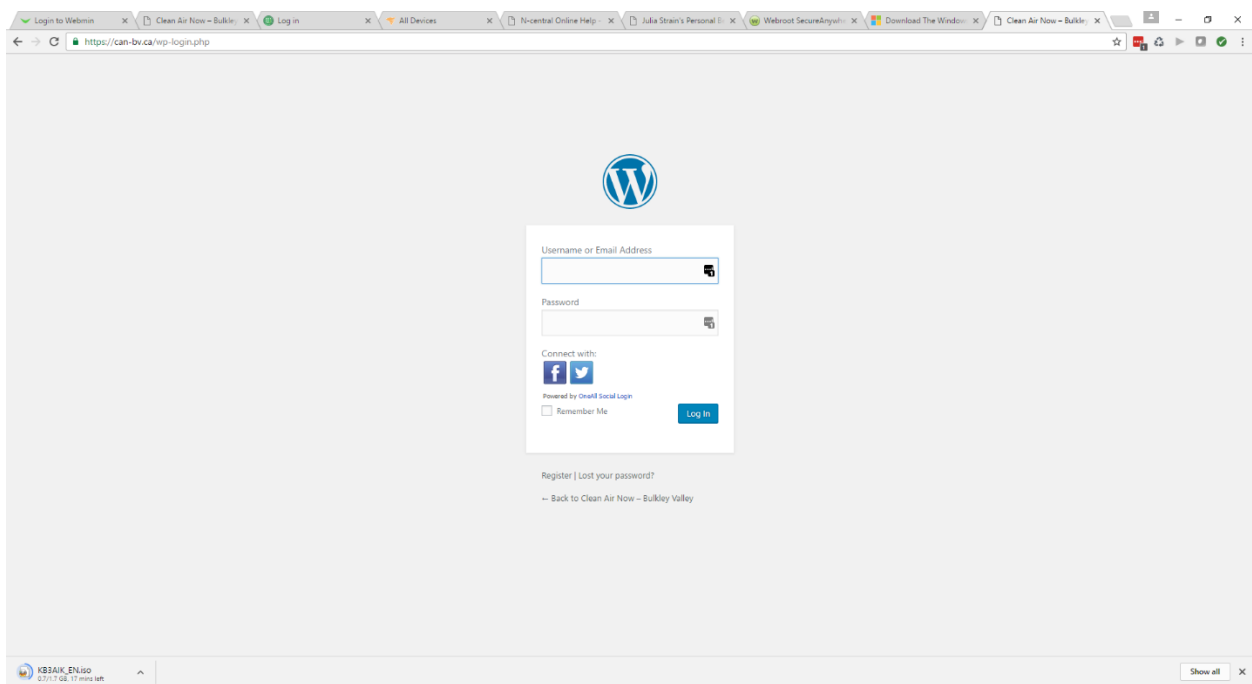

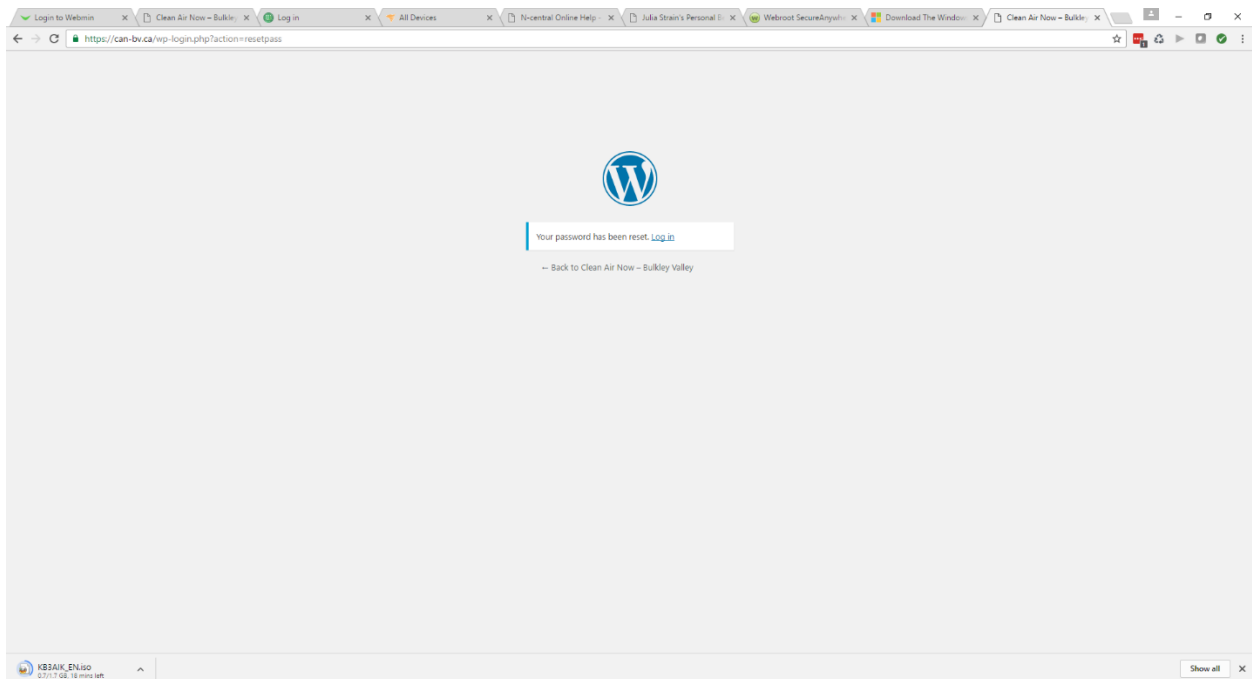

#4 Check your email. The website will send you an email that allows you to set a password. Click on the first link in the email.

#5 The system will have generated a password for you. You can use that one or enter one of your own. Then click the "Reset Password" button.

#6 Click the “Log In” link in the following screen, then enter your chosen username and password.

I expect those who have trouble with the registration and login process will have trouble using the website in general. Those people can send the info and files to either Daniel or myself and we can enter them for you.
